

**Amendments to the Specification:**

Please amend the specification as follows:

Page 7, paragraph [0016]:

Bz ✓  
[0016] In yet another refinement of the invention, the heat exchangers are provided with water or air regulating means. In the case of the water regulating means, there are preferably integrated in the heating unit a plurality of PTC (positive temperature coefficient) elements which can be activated electrically via an electronic regulator. In the case of the air regulating means, the quantity of air flowing through the corresponding heating unit is controlled at the input and/or output of the heating unit by air flaps.
